

ECMO COURSE

DMH

14th March 2020

Extracorporeal Membrane Oxygenation (ECMO), is a rapidly evolving technique with wide range of indications in refractory heart or lung failure or cardiopulmonary failure, when maximal conventional management has failed. Join the DMH ECMO team for a 1 day course that provides a detailed examination of the essentials of safe ECMO practice.

Learn the science behind the circuit, pump priming and troubleshooting. Participate in in multiple high fidelity simulations for all major ECMO emergencies, including VV (veno-venous) and VA (veno-arterial) ECMO besides practical skills required for ECMO cannulation using high fidelity task trainers. Suitable for novices and more experienced practitioners.

ECMO Course DMH

Highlights

Aim of our course is to provide high quality ECLS education.

Understanding the basic physiology of ECMO and its clinical application.

Our course consists of high-fidelity simulation and task trainer based sessions.

Emphasis on hands-on acquisition of technical skills
including ECMO cannulation.

Fees:

Doctor : Rs 5000/- | Perfusionist : Rs 3000/- | Nurse : Rs 2000/-

Applied for MMC points
